Professional Summary

Senior Software Engineer with 5+ years of experience building scalable full-stack and distributed systems, now specializing in **AI-driven platforms and agentic systems**. Experienced in designing autonomous AI workflows, tool orchestration, and multi-tenant cloud infrastructure using Kubernetes and modern DevOps practices. Strong background in Node.js, .NET, React, and real-time architectures (GraphQL, WebSockets), with a focus on performance, reliability, and clean system design. AWS Certified Solutions Architect and RHCSA with a passion for building production-grade AI systems.

Technical Expertise

Backend Development: Node.js, .NET Core, ASP.NET MVC, C#, REST API, GraphQL, gRPC

Frontend Development: React.js, React Native, JavaScript, TypeScript, Next.js, Ant Design, Material UI, Chrome Extension Development

Databases: MS SQL Server, PostgreSQL, MongoDB

DevOps & Cloud: Docker, Azure, AWS (S3, EC2, Lambda, RDS, CloudWatch), Nginx, Jenkins, Azure DevOps

Real-Time & Architecture: WebSockets, GraphQL Subscriptions, Microservices Architecture

Security: OAuth, JWT, Identity Server, Role-Based Access Control

CI/CD & Monitoring: Jenkins, Azure DevOps, Serilog, Grafana, Prometheus, Hangfire

Work Experience

Senior Engineer — Dalfin AI

January 2026 – Present

AI Systems, Kubernetes, Distributed Architecture

- Designing and building **agentic AI systems** enabling autonomous reasoning, decision-making, and tool orchestration.
- Leading a cross-functional team to deliver **production-ready AI platforms**, improving system scalability and deployment velocity.
- Architecting and managing **multi-tenant Kubernetes infrastructure** for scalable AI workloads.
- Implementing **containerized, isolated execution environments** to ensure security and efficient resource utilization.
- Driving adoption of a **monorepo architecture frontend**, improving developer productivity, code consistency, and collaboration.

Software Engineer — KrispCall Pvt. Ltd.

January 2024 – January 2026

React, Node.js, .NET

- Migrated KrispCall frontend from Create React App to Vite, improving build performance.
- Led frontend development using React.js, Ant Design, and Chrome Extensions for integration with 50+ CRM platforms.
- Built real-time user interfaces using GraphQL Subscriptions and WebSockets.
- Implemented OAuth integrations for Microsoft Teams and Dynamics 365.

- Optimized frontend state management using Apollo Cache and React Query.
- Collaborated closely with designers and product teams for seamless UX delivery.
- Mentored frontend engineers and improved overall UI performance.

Software Engineer — Info Developers Pvt. Ltd.

July 2023 – December 2023

.NET Developer

- Developed high-performance backend systems using .NET Core.
- Integrated Hangfire for background jobs and scheduled tasks.
- Designed RESTful and gRPC APIs for microservices-based architecture.
- Implemented load balancing and notification systems (Email, SMS, Push).
- Optimized SQL stored procedures and automated critical workflows.

Software Engineer — Umbrella Solutions Pvt. Ltd.

November 2020 – June 2023

Full Stack Developer (Node.js, React, .NET)

- Built and maintained full-stack applications using React, Node.js, and .NET Core.
- Developed biometric HR systems, ERP loyalty platforms, and payment-integrated ticketing solutions.
- Led mobile app development using React Native for restaurant and parking systems.
- Optimized database performance in SQL Server and PostgreSQL.
- Conducted code reviews, coordinated cross-functional teams, and managed DevOps practices.

Education

Bachelor of Computer Applications (BCA)

Indira Gandhi National Open University (IGNOU), India

Certifications

- AWS Certified Solutions Architect – Associate
- Red Hat Certified System Administrator (RHCSA) – IT Security Nepal

Key Projects

- **Nomi:** AI chatbot assistant that answers resume-related queries (experience, education, certifications).
- **Filet (Node.js Library):** Lightweight middleware for handling file uploads efficiently.
- **ListenItPro (NuGet Package):** SQL Server listener for tracking and notifying table changes.
- **KrispCall (VoIP):** Scalable frontend and real-time backend using React, GraphQL, WebSockets, and Node.js.
- **Microsoft Teams App:** Designed and published a collaborative Teams application using React.
- **ERP Loyalty System:** Full-stack rewards platform with analytics and reporting.
- **Chrome Extension for CRM Integration:** Unified calling features across multiple CRM platforms.
- **IVR System:** Automated call routing and management system.
